

OPEN HOUSE:

Seeking volunteers for a research study on a new prosthetic hand system

- Learn about a study to evaluate a new prosthetic hand system intended to provide the sense of touch, force, and hand opening to the user by wirelessly stimulating nerves in the residual limb.
- Meet the scientists and engineers who designed and developed this latest technology.
- Light lunch will be served.

Wednesday, May 24th, 2017 For more information or to RSVP
12 – 2 PM please contact
