

PARTICIPANTS NEEDED

FOR STUDIES INVESTIGATING NON-INVASIVE NEUROSTIMULATION

If you:

- are between 18 and 60 years old, and
- are in good general health

or if you are an amputee,

- have an amputation between the wrist and elbow, and are able and willing to use a myoelectric prosthetic hand
- or have an amputation between the knee and the ankle

You may be eligible to participate in a series of studies to help us investigate a novel non-invasive neurostimulation approach for delivering targeted sensory feedback, and to better understand how people perceive different sensations.

Eligible participants will take part in up to five sessions of less than 3 hours each, and will be compensated \$10 for each session. To volunteer or for more information please contact

Andres Pena - ✉ apena009@fiu.edu ☎ (305) 348-2176

This study is being conducted at FIU:
Engineering Campus, 10555 W Flagler Street, Miami, FL 33174
